

# Face Swapping

## Step 1:

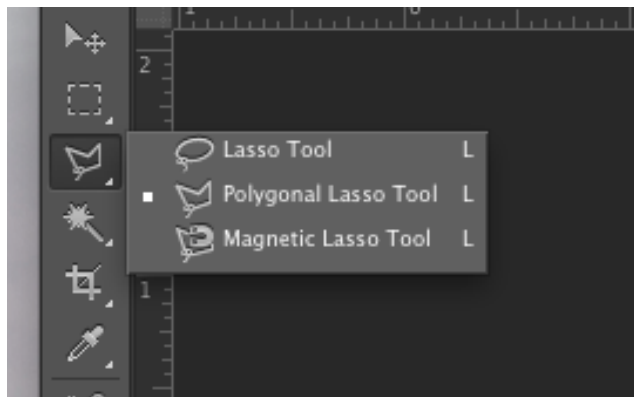

Find an image to use for the face swap. You need a picture with at least 2 people in it. Copy the picture.

Open a new document in Photoshop.

Go to Edit > Paste.

## Step 2:

Choose the Polygonal Lasso Tool, and draw a circle around the first face.

## IMPORTANT NOTE!!!

When looking for faces to swap, its easiest to do when faces are looking in the same direction.

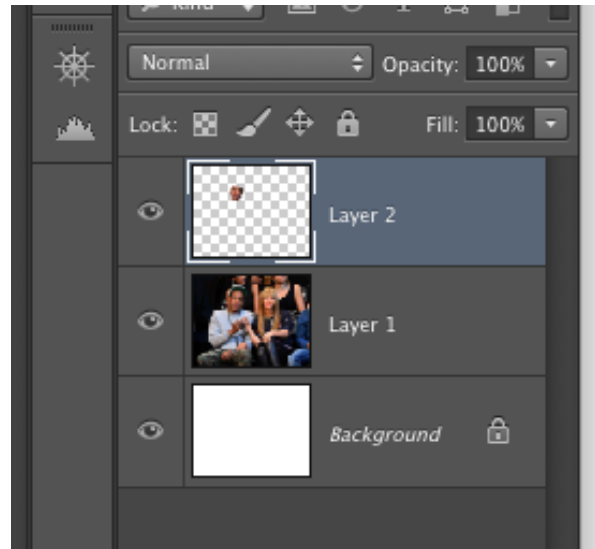

Avoid faces in profile and people wearing sunglasses.

### Step 3:

Go to Edit > Copy  
Go to Edit > Paste.

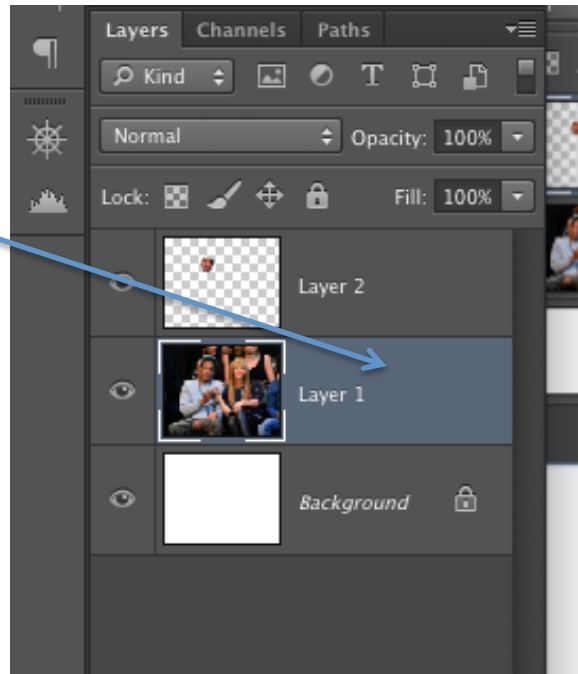

You should now have 3 layers.

### Step 4:

Click on Layer 1.

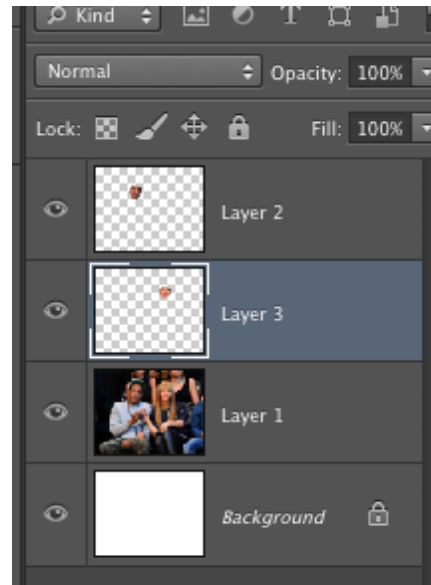

Use the Polygonal Lasso to draw a circle around the second face.

## Step 5:

Go to Edit > Copy  
Go to Edit > Paste

You should now have four layers.

## Step 6:

Click on the eyeball on layer 2.

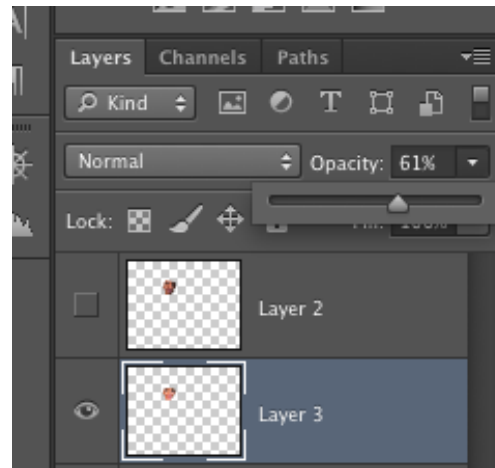

Move the face on Layer 3 to cover the other face in the picture.

## Step 7:

Turn the opacity down on the layer, so you can see both faces.

Move the top face to line up with the face below.

## Step 8:

Go to Edit > Free Transform and rotate, enlarge, or shrink the face as needed.

Press Enter when done.

## Step 9:

Turn the Opacity back up to 100%.

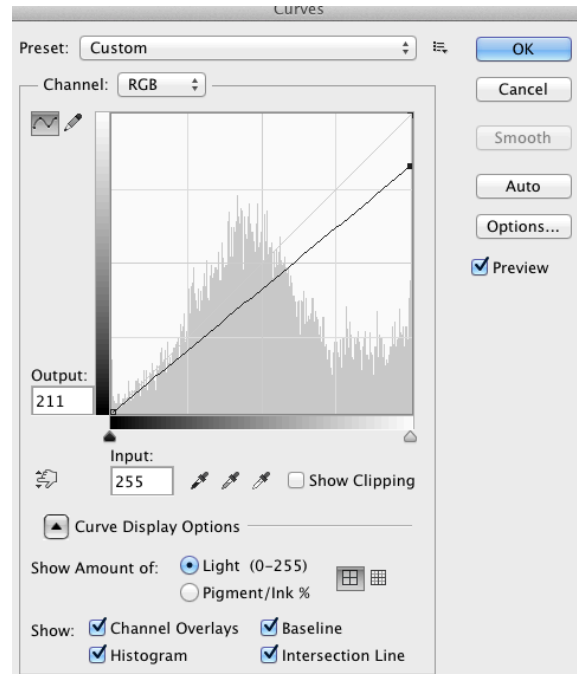

Before

## Step 10:

Go to  
Image >  
Adjustments >  
Curves

Adjust the image as  
necessary to get the skin  
tones to match.

After

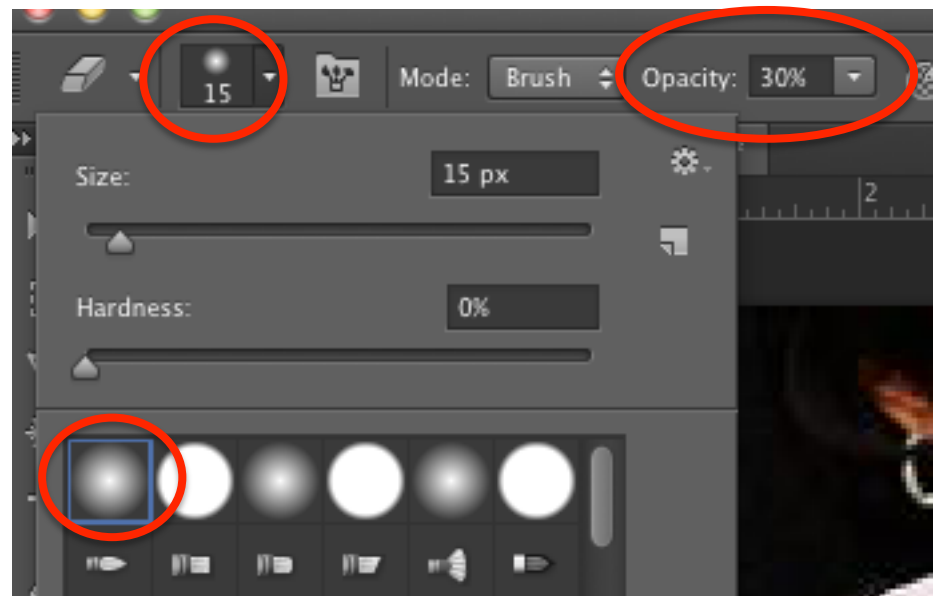

## Step 11:

Choose the Eraser Tool.

Set the brush size to 15,  
with a soft edge.

Turn the opacity to 30 %

## Step 12:

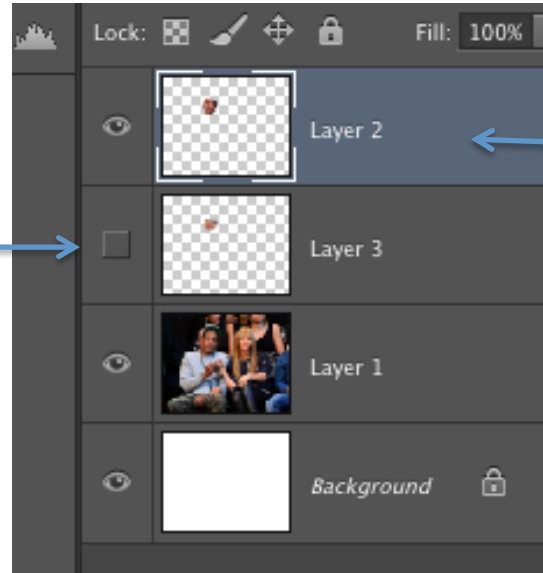

Click and drag/  
scribble to blend the  
edges of the cut face  
into the face below.

### Step 13:

Click on the eyeball on Layer 3 to hide it.

Click on Layer 2 to select the layer.

### Step 14:

Move the face on Layer 2 to cover the face on the original picture.

## Step 15:

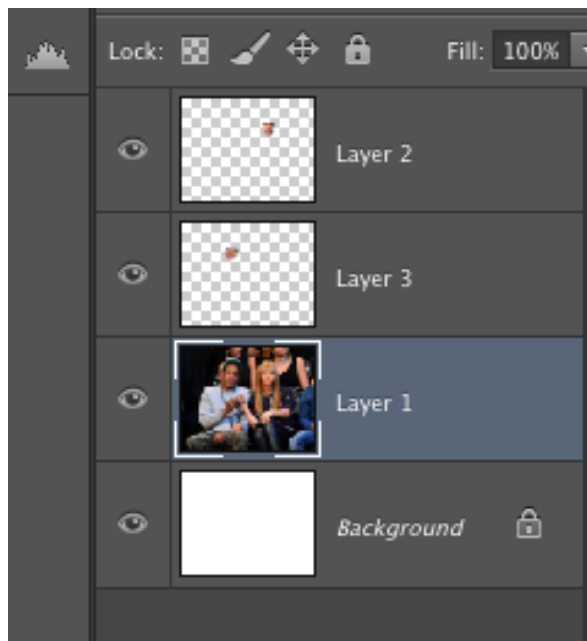

Repeat steps 7 – 12 to blend in the top face with the face below.

(adjust rotation, scale, curves, blend edges)

## Step 16:

Turn all of the eyeballs back on.

## Step 17:

Face swap complete!

Save as a jpg and post to weebly.
