

Step 1:

Create a folder for your Hockney pictures if you have not yet done so.

Step 2:

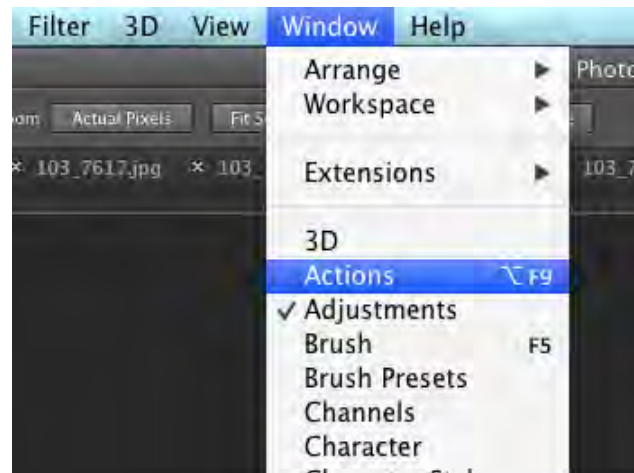

Click and drag across all of the pics in the folder.

Step 3:

Drag pictures into Photoshop. Each picture will open in a new document.

Step 4:
Look at your screen in confusion.

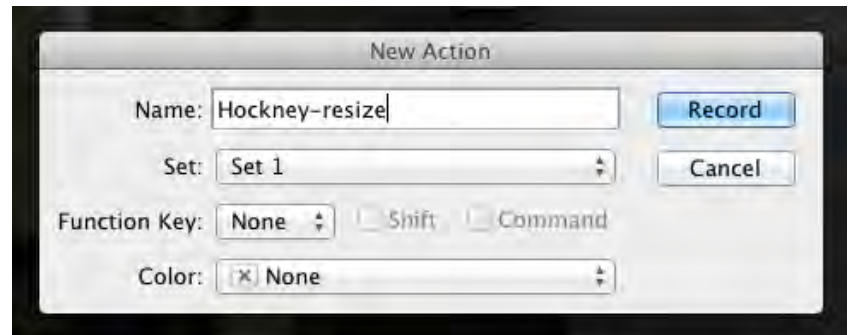

Step 5:
In Photoshop, go to Window > Actions

Step 6:
In the Actions toolbox, click on New Action.

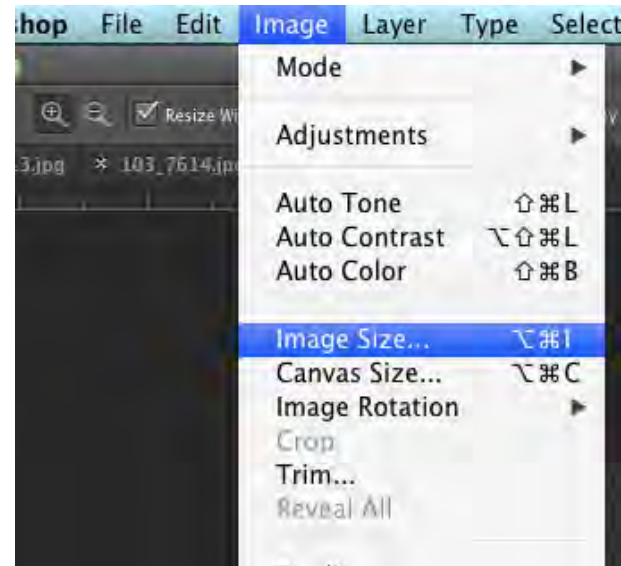

Step 7:
Name it hockney-resize

Step 8:
Press Record

Step 9:
Go to Image > Image Size

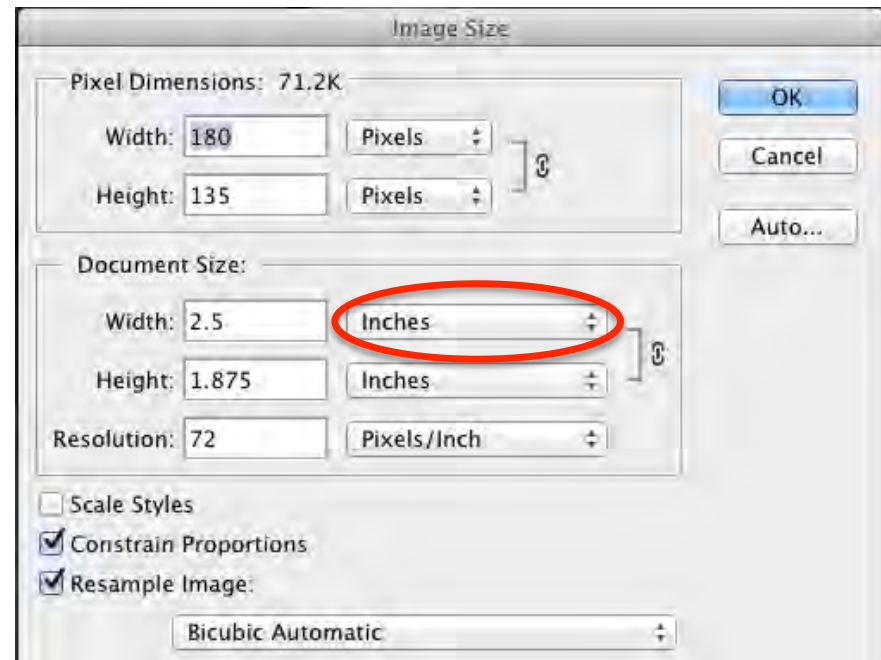

Step 10:

Enter in the dimensions:

Width = 2.5 INCHES
(Height will automatically change)
Resolution: 72

Click OK

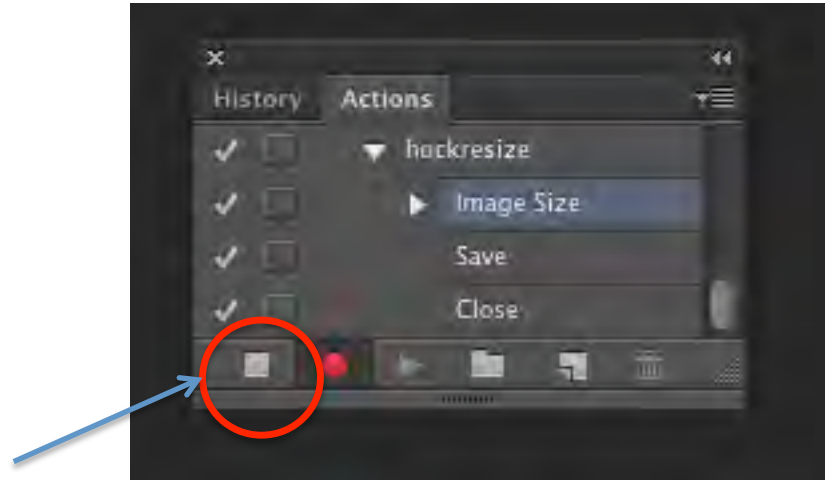

Step 11:

Go to File > Save
Go to File > Close

Step 12:

Click the Stop button in the Actions toolbox.

Step 13:

Go to File > Automate > Batch

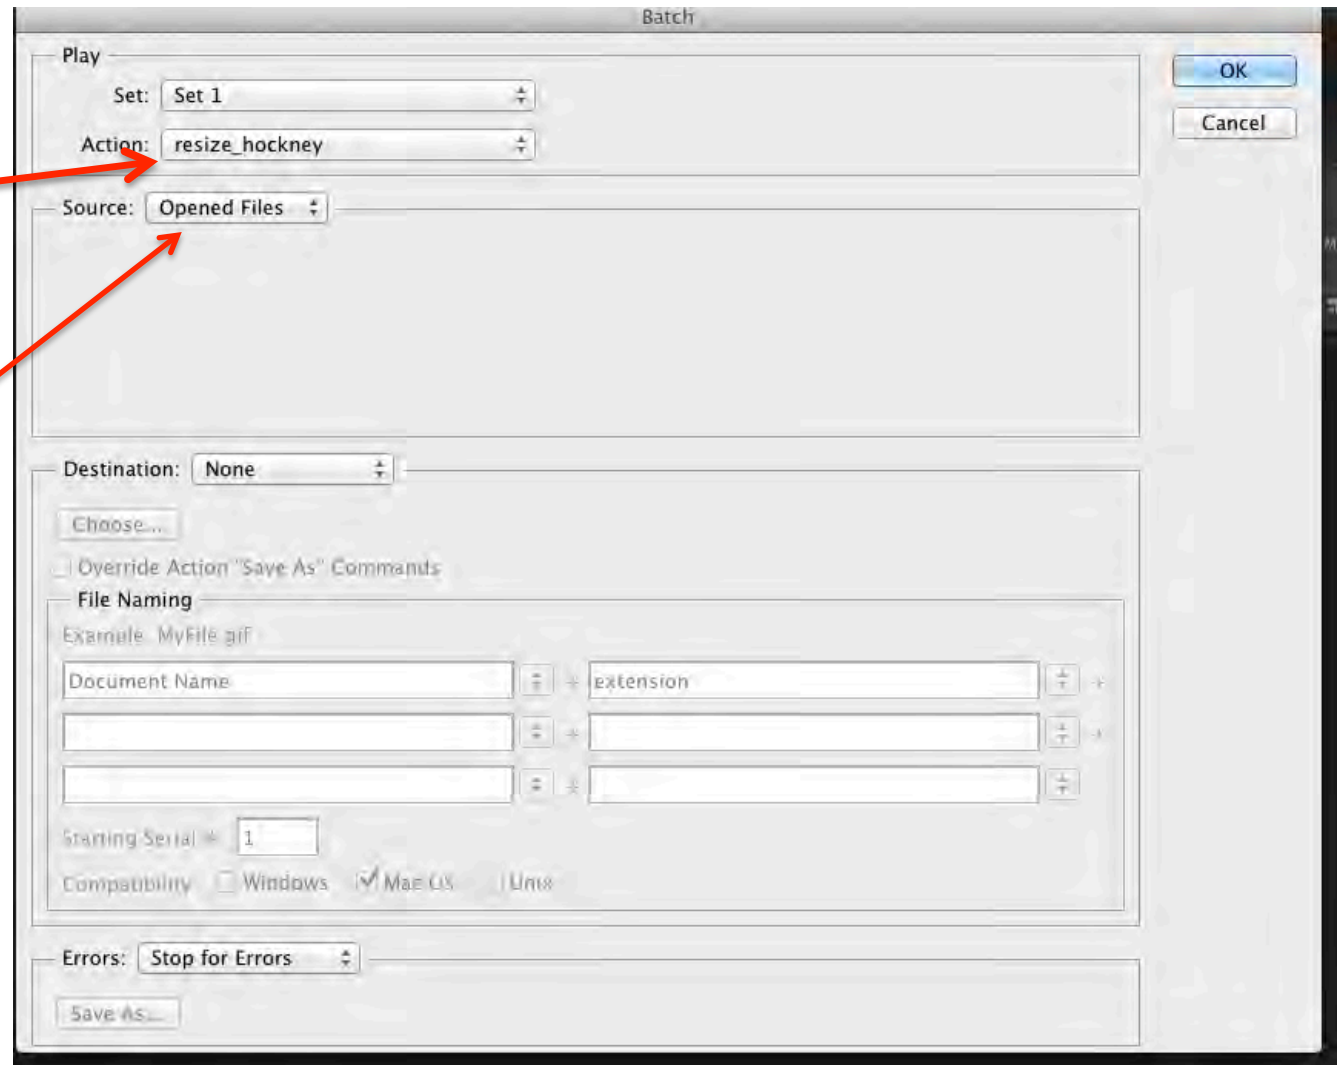

Step 14:

Make sure
“hockney-resize” is
chosen.

Change Source to
“Opened Files”

Click OK

Step 15:

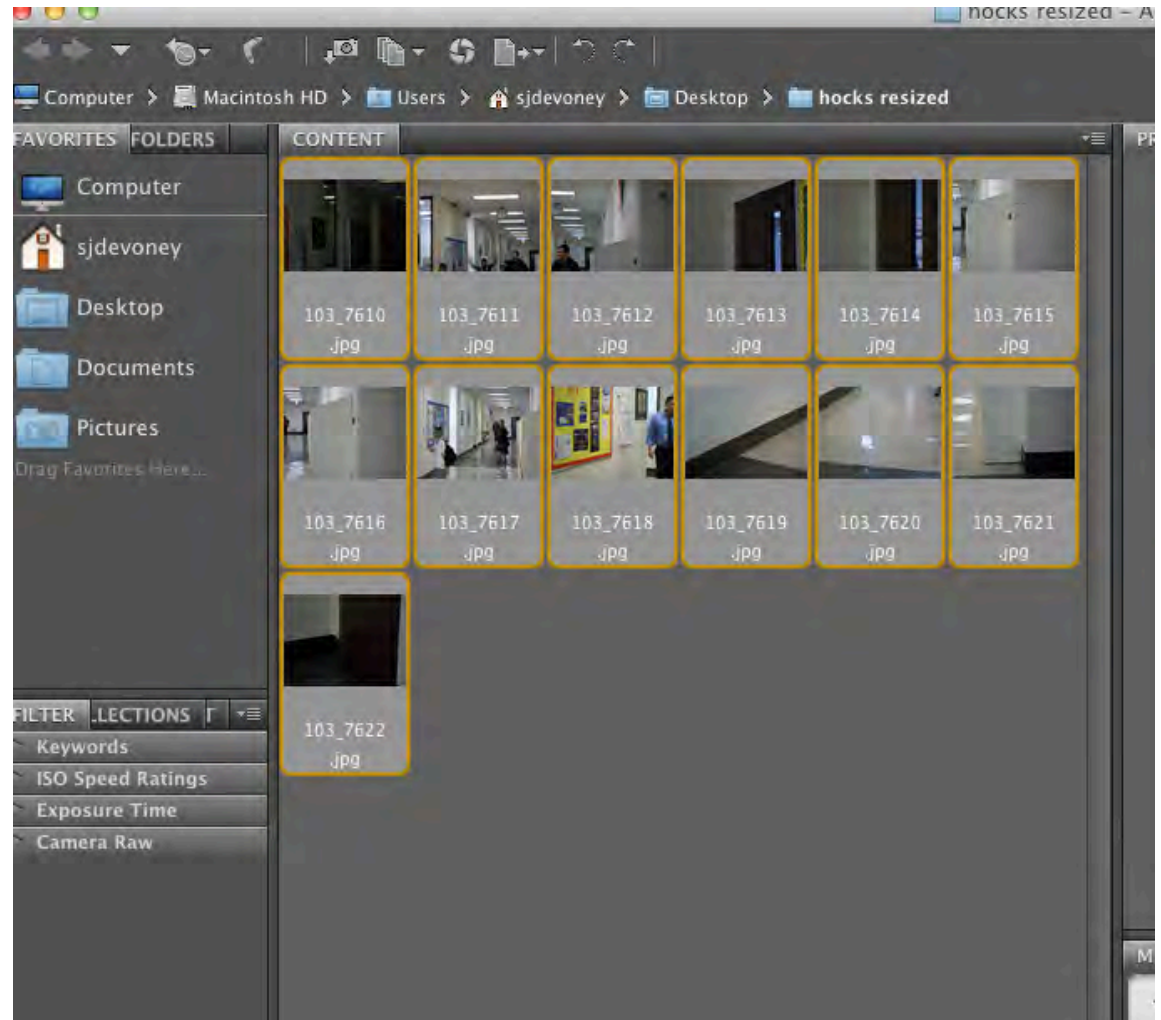

Open up Adobe Bridge

Step 16:

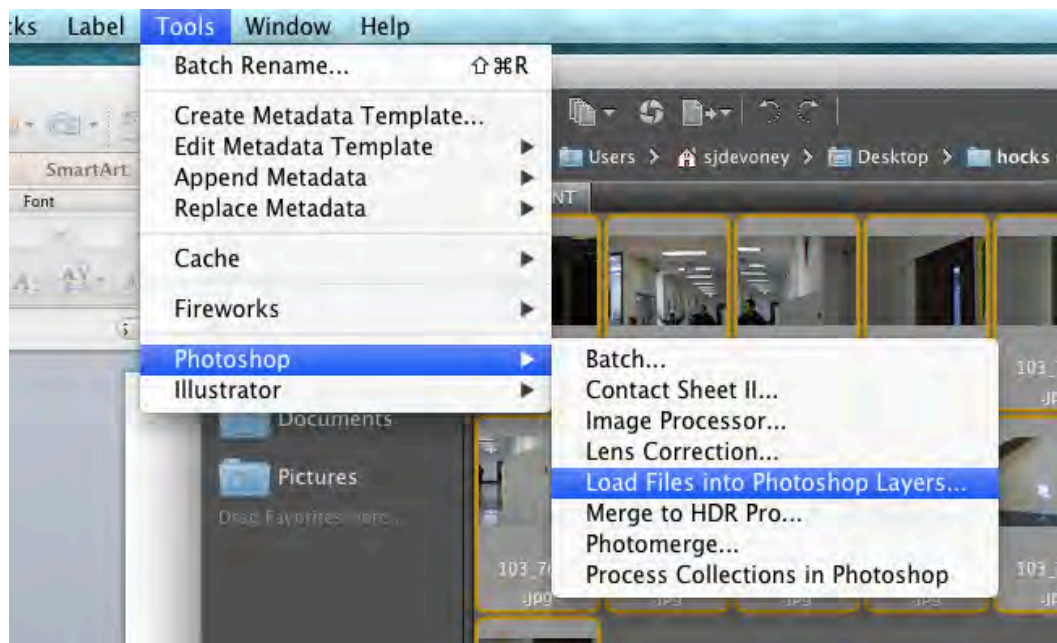

Find the folder with your Hockney pictures.

Click and drag across so that all of the pictures are selected.

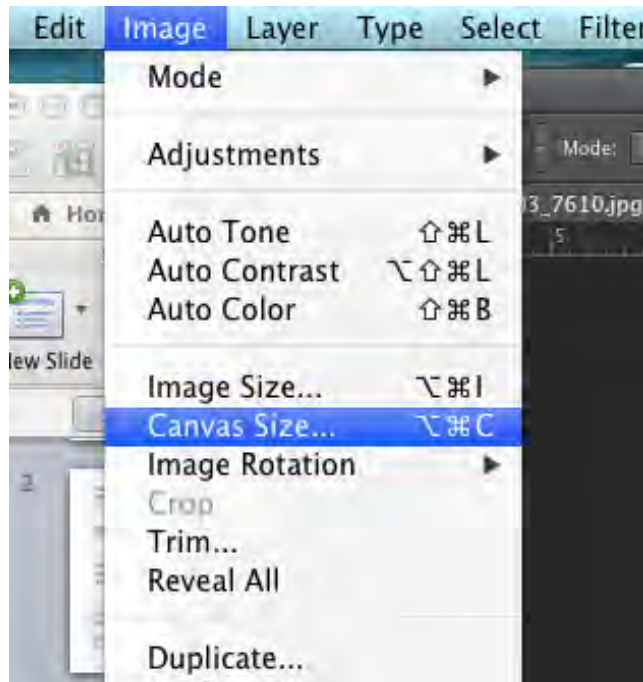

Step 17:

Go to Tools > Photoshop >
Load Files into Photoshop
Layers...

Step 18:

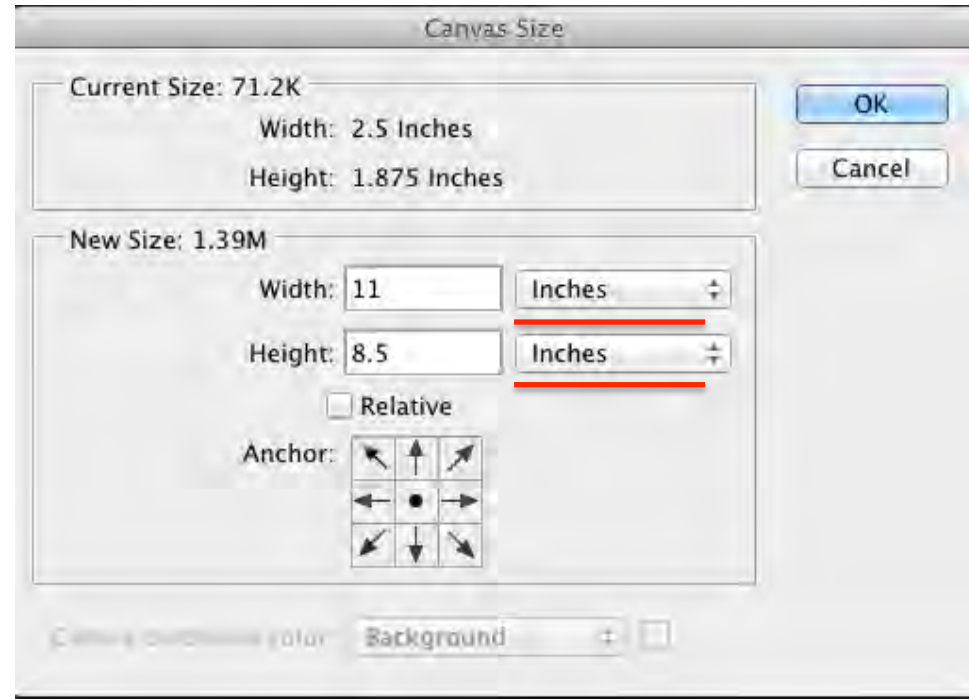

Go to Image > Canvas Size...

Step 19:

Change Width: 11 Inches
Height: 8.5 Inches

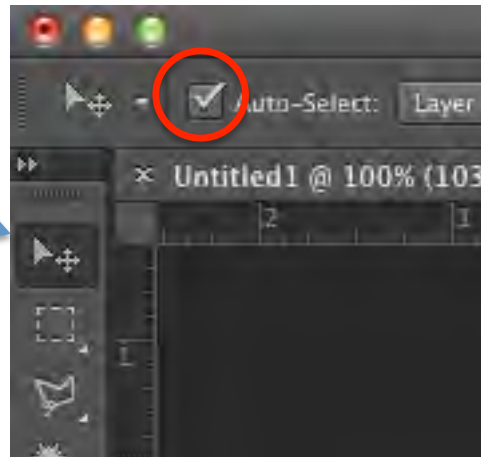

Click OK

Step 20:

Use the Move tool to
arrange the layers.

Make sure "Auto Select"
is checked.

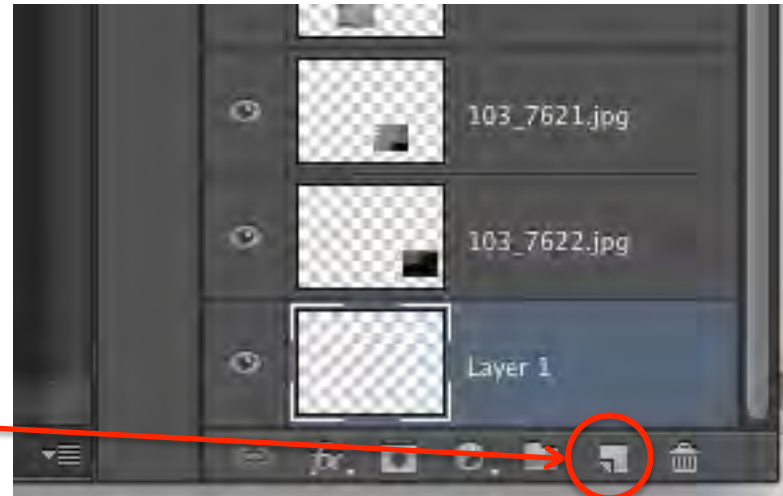

Step 21:

Choose the crop tool to change the size of the document.

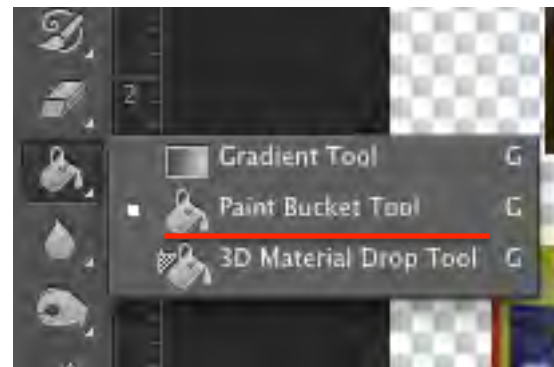

Step 22:

Make a new layer, and move the layer to the bottom.

Step 23:

Choose the Paint bucket tool. (you might have to click and hold to get the Paintbucket tool)

Step 24:

Click on the Color Picker.
Choose a color, click OK.

Step 25:

Click anywhere in the document to paint the background. Make sure you are on the right layer.

Step 26:

Save as a jpeg and post on weebly.
